SUMMARY

Took **full end-to-end ownership** of a live LLM platform at Interview Kickstart: design, build, deployment, evaluation and cost. Builds LLM pipelines, RAG and AI agents, and competes on Kaggle. **Runner-up** at the Grand Finale of Smart India Hackathon 2024, **4th place nationally** in the Rajasthan Royals hackathon, **top 8%** in the Amazon ML Challenge.

EXPERIENCE

Applied AI Intern | Interview Kickstart, Remote Apr 2026 - Oct 2026

Full end-to-end ownership of Feedback Loop, a live AI platform: 3,000+ classes, 850+ tests | Python, FastAPI, Claude API

- **Saves an estimated 3 days a week of manual review:** built for about 100 programme managers, in pilot since July 2026.
- **Turns a 4-hour class into instructor feedback in about 10 minutes for about \$1** with a multi-stage LLM pipeline.
- **Costs about \$13 a week at the team's volume:** about \$1 a class in LLM spend on free hosting; prompt caching cut it 10-15%.
- **Made the output trustworthy:** quote and timestamp per finding, a second LLM pass to refute serious ones, human approval.
- **Raised vision accuracy from 84% to 99%** by testing against a labelled answer key and sending one frame per call.
- **Shipped Ask AI:** answers questions about a class with exact transcript quotes and timestamps, about 15 cents each.
- **Built and deployed agent and RAG projects on Microsoft Foundry** for the company's Azure AI Engineer programme.

AI Engineer Intern | CloudCredits, Remote Jul 2025 - Oct 2025

- **Deployed XGBoost and Random Forest risk models** on 5M+ transactions: 34% fewer false positives than the earlier model.

PROJECTS

Kakehashi | FAR AWAY 2026 hackathon finalist, rank 14 github.com/roybishal362/Kakehashi

- **Built an LLM agent pipeline with RAG and a live job-search tool:** an LLM router picks the visa route and eligibility advice is grounded in BM25-retrieved rules; an LLM judge flagged 0 contradictions in 132 fact checks over 6 runs.

C-TRUST (Novartis NEST 2.0 National Semifinalist) github.com/roybishal362/NEST_2.0_Hackthon

- **Built a rule-based multi-agent risk engine** for clinical-trial data quality; FastAPI, React, 550+ passing tests.

Amazon ML Challenge 2025 | Top 8% on the final leaderboard, team github.com/roybishal362/Amazon_ML_2025

- **Designed the multimodal pricing pipeline:** TF-IDF text, EfficientNetBo image embeddings, LightGBM + XGBoost.

ACHIEVEMENTS

- **Smart India Hackathon 2024:** Runner-up at the Grand Finale (Indian Sign Language problem statement).
- **Rajasthan Royals SuperRR Selector Hackathon 2025:** 4th place nationally (top 8 at the finale; 7,500+ participants, solo).
- **Amazon ML Challenge 2025:** Top 8% on the final leaderboard (team).
- **Novartis NEST 2.0:** National Semifinalist with C-TRUST.
- **FAR AWAY 2026 hackathon:** Finalist, rank 14, with Kakehashi (solo).
- **Research:** first-author paper under review at JAIR; co-author paper under review at Pattern Recognition.
- **Kaggle:** 5 competitions across health data, medical imaging, game AI and LLM optimisation.
- **Microsoft Certified:** Azure AI Apps and Agents Developer Associate (AI-103); Azure AI Fundamentals (AI-901).
- **Coding practice:** 100+ problems solved on LeetCode; gold badge in SQL (5 stars) on HackerRank.
- **Google Developer Groups on Campus:** AI/ML Co-Lead, ran 8 GenAI workshops for 400+ developers.

TECHNICAL SKILLS

LLM and GenAI: LLM pipelines, RAG, AI agents, LangChain, FAISS, Azure AI Search, prompt caching, LLM evaluation

ML: Python, SQL, PyTorch, TensorFlow, scikit-learn, XGBoost, LightGBM, CatBoost, Hugging Face

Engineering: FastAPI, Next.js, REST APIs, PostgreSQL, Docker, pytest, Git, Claude and Groq APIs, Microsoft Foundry

EDUCATION

B.E. in Artificial Intelligence and Data Science 2022 - 2026 | CGPA 8.99/10

Dr. D. Y. Patil Institute of Technology, Pune
