SUMMARY

Took **full end-to-end ownership** of a live LLM platform at Interview Kickstart: design, build, deployment, evaluation and cost. Builds LLM pipelines, RAG and AI agents, and competes on Kaggle. Runner-up at the Grand Finale of Smart India Hackathon 2024, 4th place nationally in the Rajasthan Royals hackathon, top 8% in the Amazon ML Challenge.

EXPERIENCE

Associate Product Manager Intern | Interview Kickstart, Remote Apr 2026 - Present

Full end-to-end ownership of Feedback Loop, a live AI platform scoring 3,000+ classes | Python, FastAPI, Claude API

- **Built for a team of about 100 programme managers**, in pilot since July 2026: saves an estimated 3 days a week of watching class recordings and writing instructor feedback by hand.
- **Built a multi-stage LLM pipeline** that turns a 4-hour class into instructor feedback in about 9 minutes for about \$1.
- **Owned the platform end to end**: Next.js app, Dockerised FastAPI worker, PostgreSQL with row-level security, 600+ tests.
- **Engineered trust into the output**: every finding carries a quote and timestamp from the class, a second LLM pass tries to refute serious findings, and a person approves each note.
- **Raised vision accuracy from 84% to 99%** by testing against a labelled answer key and sending one frame per call.
- **Cut LLM cost 11% on long classes** by tracing a 4x rise in output tokens and caching the shared prompt block.

AI Engineer Intern | CloudCredits, Remote Jul 2025 - Oct 2025

- **Deployed XGBoost and Random Forest risk models** on 5M+ transactions, cutting false positives 34% in production.

PROJECTS

Kakehashi | FAR AWAY 2026 hackathon finalist, rank 14 github.com/roybishal362/Kakehashi

- **Built a 6-agent assistant with RAG and live tools**: agents call job, statistics and flight APIs and answer only from retrieved official sources; 0 contradicted facts in 6 evaluation runs, against 69 without grounding.

C-TRUST (Novartis NEST 2.0 National Semifinalist) github.com/roybishal362/NEST_2.0_Hackthon

- **Built a rule-based multi-agent risk engine** for clinical-trial data quality; FastAPI, React, 550+ passing tests.

Amazon ML Challenge 2025 | Top 8% on the final leaderboard, team github.com/roybishal362/Amazon_ML_2025

- **Designed the multimodal pricing pipeline**: TF-IDF text, EfficientNetBo image embeddings, LightGBM + XGBoost.

Child mental health: problematic internet use | Kaggle; led to a first-author paper under review at JAIR

- **Built a PyTorch autoencoder with a LightGBM, XGBoost and CatBoost ensemble** under 5-fold cross-validation.

ACHIEVEMENTS

- Smart India Hackathon 2024 - Runner-up at the Grand Finale (Indian Sign Language problem statement).
- Rajasthan Royals SuperRR Selector Hackathon 2025 - 4th place nationally (top 8 at the finale; 7,500+ participants, solo).
- Amazon ML Challenge 2025 - Top 8% (team); Novartis NEST 2.0 - National Semifinalist; FAR AWAY 2026 - Finalist, rank 14.
- Kaggle - 5 competitions; under review: first-author paper at JAIR, co-author paper at Pattern Recognition.

TECHNICAL SKILLS

LLM and GenAI: LLM pipelines, RAG, AI agents, LangChain, FAISS, Hugging Face, prompt engineering, LLM evaluation

ML: Python, SQL, PyTorch, TensorFlow, scikit-learn, XGBoost, LightGBM, CatBoost, pandas

Engineering: FastAPI, Next.js, REST APIs, PostgreSQL, Docker, pytest, Git, Claude and Groq APIs, Azure AI

EDUCATION

B.E. in Artificial Intelligence and Data Science 2022 - 2026 | CGPA 8.99/10

Dr. D. Y. Patil Institute of Technology, Pune

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (AI-103), Azure AI Fundamentals (AI-901), 2026
